

Category:Epidemiology

Pages in category "Epidemiology"

The following 200 pages are in this category, out of 220 total.

(previous page) (next page)

A

- A descriptive study
- A susceptible organism in the process of spreading infection
- Absolute risk
- Agents for chemical disinfection
- AIDS diagnosis
- Air pollution
- Airborne Infections
- Alimentary Infections
- Allergens in the Environment
- Alternate target
- Alternative Diets
- An experimental study
- Analytical Studies
- Anatoxin
- Anthropozoonoses
- Anthropozoonosis
- Anti-epidemic measures in the outbreak
- Assessment of nutritional status
- Atributive risk
- Attack rate
- Attributable and Relative Risks, Odds Ratio
- Average

B

- Basic epidemiological characteristics
- Basic Health Indicators
- Biological exposure tests
- Biological monitoring
- Biological weapons
- Blood-borne diseases
- WikiLectures:Books/Hygiene and Epidemiology (LF1, GM)
- Borrelia burgdorferi
- Breakdown of vaccination in the Czech Republic
- Breast Feeding

C

- Carbohydrates in Human Nutrition
- Cat-scratch disease
- CBRNE
- Chikungunya
- Children's sandpit
- Cholesterol in Human Nutrition
- Cohort
- Colorectal carcinoma/epidemiology
- Combined lighting, glare
- Community-acquired pneumonia
- Confidence intervals
- Core set (population); selection, principle of statistical induction
- Correlation and Regression
- Covid-19

D

- Data types
- Descriptive characteristics
- Descriptive statistics
- Descriptive Studies
- Dietary Fibre in Human Nutrition

- Dietary Guidelines for Population
- Different Forms of Tobacco Use
- Differential diagnosis of diarrheal diseases
- Differential diagnosis of diarrhoeal diseases
- Dirofilariasis
- Disease elimination
- Diseases of the skin and mucous membranes
- Disinfection and sterilization
- Distribution function
- Division of vaccination in the Czech Republic
- Drinking Water

E

- Echinococcosis
- Effects of ionising radiation
- Effects of ultraviolet radiation
- Elimination of infection
- Environment and Health
- Environment Pollution and Human Exposure, Biological Monitoring
- Portal:Epidemiology
- Epidemiology
- Epidemiology of a scientific paper
- Epidemiology of AIDS
- Epidemiology of food allergies
- Epidemiology of injuries
- Epidemiology of Tobacco Dependence
- Eradication of disease
- Portal:Exam Topics in Hygiene and Epidemiology (1LF, D)
- Experimental Studies

F

- False Negativity
- False Positivity
- Fat Soluble Vitamins
- Focus of infection
- Food Contaminants
- Foodborne diseases
- Foreign substance in food
- Foreign substances in food
- Formulation of hypotheses
- Fourfold and Contingency Tables

G

- Genital herpes

H

- Health Issues of Traffic Emissions
- Health risks from water
- Health Risks in Indoor Environment
- HIV
- Portal:Hygiene
- Hygiene and Epidemiology
- Hygiene of medical facilities
- Hypothesis Testing

I

- Immunization
- Immunization in Czech Republic
- Immunization in Travelling Medicine
- Immunization in United Kingdom
- Immunization in Your Country
- Incidence
- Incidence of Tumors
- Individual Sources of Drinking Water
- Infection
- Infections of Skin and Superficial Mucosa
- Infectious mononucleosis
- Infectious mononucleosis syndrome
- International classification of diseases

- Issues of Artificial Illumination
- Issues of Day Lighting and Combined Illumination

K

- Kabrhel's Index

L

- Lethality Rate
- Lipids and Carbohydrates in Human Nutrition
- Lipids in Human Nutrition
- Local physical stress (hygiene)

M

- Mass Water Supply
- Measles
- Measurement of dependence, correlation and regression
- Measures of Central Tendency and Variability
- Meta-analysis
- Methodology in epidemiology
- Microorganisms in food
- Minerals and Trace Elements in Human Nutrition
- Minerals in Human Nutrition
- Morbidity
- Mortality
- Mumps

N

- Nicotine Replacement Therapy
- Non-specific immunity
- Nonspecific immunity
- Nosocomial Infections
- Nutrients

O

- Occupational accident
- Odds Ratio
- Organic substances in buildings

P

- Pandemic
- Passive immunization
- Plague
- Pneumocystis jirovecii
- Poisson distribution
- Pollutants in the environment
- Population (epidemiology)
- Population Sample
- Prevention
- Prevention and screening in oncology
- Preventive Anti-epidemic Measures
- Process of Infection Propagation
- Protein in Human Nutrition
- Proteus mirabilis

Q

- Q fever

R

- Referral rating
- Regular vaccinations in Czech republic
- Regular vaccinations in the Czech Republic
- Reliability
- Requirements at Examination Methods
- Requirements for examination techniques
- Requirements for the quality of drinking water
- Risk factor and misleading factor

- Risk factor and interacting factor
- Risk factors for cardiovascular diseases
- Risk factors for nosocomial infections
- Risk Factors of Cancer
- Risk factors of nosocomial infections

S

- Scabies
- Schistosomiasis
- Sensitivity
- Smallpox
- Smoking fumes
- Soil Health Risks
- Source of Infection
- Source of infections
- Sources of error in scientific studies
- Specific immunity
- Specificity
- Portal:State Exam Topics in Hygiene and Epidemiology (1LF, GM)
- Statistical file
- Statistical Induction Principle
- Statistical inference
- Sterilization (hygiene)
- Stochastic effects of ionizing radiation
- Substance abuse
- Surveillance
- Survival Rate
- Swimming pools and pools
- Systematic review

T

- Teniosis
- Thermal and humid microclimate
- Tick-borne encephalitis
- TOBACCO
- Tobacco Dependence
- Tobacco Dependence Prevention
- Tobacco Dependence Treatment
- Toxic Metals in Environment
- Trace Elements in Human Nutrition
- Transmissible diseases
- Transmission of infectious agents
- Transmission of pathogens
- Types of food

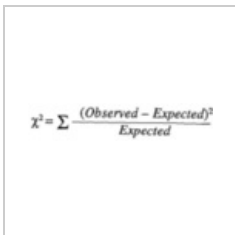

V

- Vaccines
