

Category:Pathobiochemistry

Pages in category "Pathobiochemistry"

The following 200 pages are in this category, out of 247 total.

(previous page) (next page)

A

- ABB/Questions and Case Studies
- ABR / Questions and case studies
- ABR/Questions and Case Studies page
- Acid-Base balance
- Acid-base balance disorders
- Acidosis (signpost)
- Acute Phase Reactants
- Acute phase reactants
- Advance glycation products
- Advanced glycation products
- Aging of the organism
- Alarmin
- Alkalosis
- Alkalosis (signpost)
- Alkaptonuria
- Amino acid metabolism
- Ammonia
- Anticancer therapy
- Antioxidant protection of the human body
- Antitumor therapy
- Apoptosis

B

- Basic reactive forms of oxygen and nitrogen
- Bilirubin - Questions and Casuistry
- Biochemical Diagnosis of Myocardial Infarction
- Biochemical examination for patient with diabetes mellitus
- Biochemical examination in hyperlipoproteinemia
- Biochemical examination of the pancreas
- Biochemical examinations in acute myocardial infarction
- Biochemical indicators of acute myocardial infarction
- Biology of tumor growth

C

- C-reactive protein
- Calcium phosphate metabolism
- Cancer Cells Characteristics
- Carbohydrate coefficient transferrin
- Carbohydrate deficient transferrin
- Carbohydrates in food
- Carbohydrates in the diet
- Carbon monoxide intoxication
- Carcinogenicity of Substances and Factors in the Environment
- Caspases
- Causes of pathological conformation of proteins
- Cerebral-induced salt loss syndrome
- Chaperones
- Combined disorders of acid-base balance
- Congenital adrenal hyperplasia
- Congenital disorders of glycosylation
- Congenital disorders of phenylalanine metabolism
- Congenital glycosylation disorders
- Correction and compensation of acid-base balance disorders
- Correction and compensation of acid-base imbalances
- Cretenismus
- Cretinism
- Crigler-Najjar syndrome
- Cytochrome P450

- Cytostatics

D

- User:Deleted
- Diabetes insipidus
- Diabetes mellitus
- Diabetes mellitus type 1 (biochemistry)
- Difference between average and maximum lifespan
- Disorders of acid-base balance
- Disorders of aromatic and branched chain amino acid metabolism
- Disorders of Calcium And Phosphate Metabolism
- Disorders of cobalamin metabolism
- Disorders of creatine synthesis
- Disorders of DNA repair mechanisms in tumor cells
- Disorders of folate metabolism
- Disorders of fructose metabolism
- Disorders of galactose metabolism
- Disorders of glucose metabolism
- Disorders of glucose metabolism/Questions and case studies
- Disorders of iron metabolism
- Disorders of lipid metabolism
- Disorders of lipid metabolism (detailed)
- Disorders of lipid metabolism/Questions and case studies
- Disorders of lysosomal metabolism / Deficiency of enzyme activators of lysosomal hydrolases
- Disorders of lysosomal metabolism / Lysosomal hydrolase deficiency
- Disorders of lysosome metabolism/Lysosomal hydrolase deficiency
- Disorders of Purine and Pyrimidine metabolism
- Disorders of purine metabolism
- Disorders of pyrimidine metabolism
- Disorders of uric acid metabolism
- Disorders of uric acid metabolism / Questions and case reports
- Disorders of uric acid metabolism/Questions and case studies
- Disorders of water metabolism
- Disturbances in water management in the body
- DNA Methylation
- Dysbalance natria (pediatrics)
- Dysbetalipoproteinemia
- Dysbetalipoproteinemie
- Dyslipidemia
- Dysproteinemia

E

- Eating disorders.
- Eating Disorders: Questions and Case studies
- Eicosanoids/Questions and case reports
- Elements of signal transduction as therapeutic targets in oncology
- Energy metabolism and disorders
- Epithelia (pathobiochemistry)
- Epithelium (Pathobiochemistry)
- Ethanol
- Examination for thyroid diseases
- Examination methods in DMP
- Examination methods of inherited metabolic disorders
- Examination of antioxidant capacity parameters
- Examination of concentration ability of the kidneys
- Examination of the concentrating ability of the kidneys
- Examination of urinary sediment
- Excitotoxicity in the pathogenesis of CNS disorders

F

- Fabry Disease
- Fats in diet
- Fructose metabolism

G

- Galactitol
- Gene expression disorders/Questions and case studies
- Germ cells
- Glucose in the urine
- Glucose metabolism disorders
- Glucose 6 phosphate dehydrogenase deficiency

- Glucose-6-phosphate dehydrogenase deficiency
- Glycemia
- Glycogenosis
- Glycogenosis / question and case reports
- Glycogenosis / Questions and case reports
- Glycogenosis/ Classification and basic characteristics of glycogenoses
- Glycoproteinoses
- Glycoproteinoses

H

- Hereditary disorders of amino acid metabolism / Questions and case reports
- Hereditary disorders of amino acid metabolism/Questions and case studies
- Hereditary disorders of sugar metabolism
- Hereditary metabolic disorders / Bone marrow and organ transplantation, gene therapy
- Talk:Hereditary metabolic disorders / Pathogenetic mechanisms
- Hereditary metabolic disorders / Pathogenetic mechanisms
- Hereditary metabolic disorders / Treatment of diseases caused by disorders of amino acid and carbohydrate metabolism
- Hereditary metabolic disorders of complex molecules
- Hereditary metabolic disorders/Genetic background
- Hyperammonemia
- Hyperkapnia
- Hypernatremia (pediatrics)
- Hyperstenuria
- Hypocapnea
- Hypochloraemia
- Hypochloremia
- Hypokalemia
- Hypokapnia
- Hyponatremia (pediatrics)
- Hypophosphatemia

I

- Indoor environment (pediatrics)
- Internal environment (pediatrics)
- Intoxication
- Investigation of antioxidant capacity parameters
- Investigation of the metabolism of porphyrins
- Isoenzymes
- Isostenuria
- Isosthenuria
- Isovaleric aciduria

K

- Keto bodies
- Ketoacidosis (FBLT)
- Ketones
- Krabbe disease

L

- Laboratory testing of cellular immunity
- Lactate dehydrogenase
- LCHAD deficiency
- Leucinoses
- Lipid peroxidation
- Lipidoses
- Lipidosis
- LRO
- Lysosomal Diseases
- Lysosome-related organelles
- Lysosomes

M

- Mechanism of action of poisons
- Mechanism of poisoning
- Mechanisms of cancer development
- Mechanisms of maintenance of acid-base balance
- Mechanisms of tumor formation
- Mediators of inflammation, Alarmins
- Metabolic syndrome and insulin resistance

- Metabolic syndrome and insulin resistance
- Methemoglobin
- Methotrexate
- Mitochondrial disease
- Mitochondrial diseases / Respiratory chain enzyme deficiency
- Molecular mechanisms of metastasis
- Molecular-biological Diagnostics in Oncology
- Monitoring of the internal environment in intensive care
- MTOR a inhibitory mTOR
- Mucopolysaccharidosis
- Mucopolysaccharidosis II. type
- Mucopolysaccharidosis III. type
- Mucopolysaccharidosis IV. type
- Mutator genes, cell genome stability
- Mutator genes, stability of the cell genome
- Myopathy
- Myxedema

N

- Natriuretic peptides
- Neovascularization
- Newborn screening
- NO-synthase
- Nutritional disorders
- Nutritional disorders / Questions and case reports

O

- Options for minimal residual disease detection

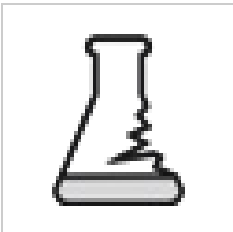

P

- P53
- Parameters of liver synthetic function
